Abstract

Background

The present study is one in a series of planned studies aiming to catalogue the whole order Diptera in both Egypt and Saudi Arabia.

New information

All known Egyptian and Saudi Arabian conopid taxa are systematically catalogued in the present study. Three species are recorded herein for the first time from Saudi Arabia: *Conops (Asiconops) elegans* Meigen, 1804 and *Thecophora atra* (Fabricius, 1775) (Al-Baha region, south-western of Saudi Arabia), and *Conops (Conops) quadrifasciatus* De Geer, 1776 (Tabuk region, north-western of Saudi Arabia). *Physocephala variegata* (Meigen, 1924) is also recorded for the first time from Gebel Elba, the south-eastern triangle of Egypt. Considering that Gebel Elba in Egypt and Al-Baha in Saudi Arabia are affiliated to the Afrotropical Region, this is the first time *Physocephala variegata* and *Thecophora atra* have been recorded from the Afrotropical Region. An updated taxonomy,

world and local distributions, dates of collection and some coloured photographs are provided.

Keywords

thick-headed flies, local distribution, dates of collection, new records

Introduction

The Conopidae, commonly known as thick-headed flies, are an interesting brachycerous family of usually large-sized wasp-like flies. Many conopids are most frequently found at flowers feeding on nectar using their long proboscis and considered as important pollinators. The majority of conopid larvae are obligatory endoparasitoids of adult Hymenoptera, such as bees and wasps. Adult conopid females aggressively intercept their hymenopterous hosts in the field to deposit their eggs (Freeman (1966), Gibson and Skevington (2013), Pape et al. (2011), Stuke (2017), Azmy et al. (2016)). The family Conopidae is represented by 808 valid species assigned to 57 genera worldwide (Stuke 2017). Conopids are found in all parts of the world, except Antarctica and the Pacific Islands (Gibson et al. 2013).

Egypt and Saudi Arabia are two neighbouring Middle Eastern countries, separated by the Gulf of Aqaba and the Red Sea (Fig. 1). Both countries are located at the junction of the Palaearctic and the Afrotropical Regions and the faunal affiliation of them is mainly Palaearctic, except Gebel Elba, the south-eastern triangle of Egypt and the south-western part of Saudi Arabia, south to the Tropic of Cancer, which are considered as Afrotropical (Hölzel 1998, Wallace 1876, El-Hawagry and Gilbert 2014, El-Hawagry et al. 2020).

Some previous studies have been carried out in Egypt on the taxonomy and faunistics of the family Conopidae, including Kröber (1924), Kröber (1925), Kröber (1927), Kröber (1929), Steyskal and El-Bialy (1967), Mohammed and Negm (1991), Azmy (2016) and Azmy et al. (2016), in addition to some miscellaneous studies which described some new species from Egypt as Kröber (1915a), Wiedemann (1830), Macquart (1835) and Rondani (1850). On the other hand, no previous faunistic or taxonomic studies on the family Conopidae have been carried out before in Saudi Arabia and only a few species have been described or recorded there amid some miscellaneous studies, such as Macquart (1851), Kröber (1915a), Zimina (1963), Walker and Pittaway (1987), Abu-Zoherah et al. (1993), Stuke and Clements (2008), El-Hawagry et al. (2016) and El-Hawagry et al. (2017).

The abundance and diversity of conopid species in both Egypt and Saudi Arabia seem to be low (17 species in Egypt and 12 species in Saudi Arabia) comparable with the total number of species known from the Palaearctic Region (173 species) and from the Afrotropical Region (187 species) (Stuke 2017). However, this should be taken with caution, since the family Conopidae seems to lack sampling efforts, especially in Saudi Arabia. This is most likely due to the fact that documentation of biological diversity in Saudi

Arabia began in the second half of the 1960s and no systematic studies on the Conopidae have been previously conducted in this country. We think that the faunistic data of these flies in Egypt and Saudi Arabia is still scanty and more efforts would be highly required.

Figure 1. [doi](#)
A satellite map of Egypt and Saudi Arabia.

The taxonomy of Conopidae in both Egypt and Saudi Arabia is updated in the present study. Twenty species assigned to five genera and three subfamilies (Conopinae, Myopinae and Zodioninae) are treated (Table 1). Three species, *Conops (Asiconops) elegans* Meigen, 1804, *Conops (Conops) quadrifasciatus* De Geer, 1776 and *Thecophora atra* (Fabricius, 1775), are recorded for the first time from Saudi Arabia.

Table 1.
Conopid species treated in the present study as recorded from Egypt and Saudi Arabia (* = recorded, - = not recorded).

Species	Egypt	Saudi Arabia
Subfamily CONOPINAE		
Tribe CONOPINI		
<i>Conops (Asiconops) elegans</i> Meigen, 1804	*	* (new record)
<i>Conops (Asiconops) flavifrons</i> Meigen, 1804	*	-
<i>Conops (Asiconops) nubeculipennis</i> Bezzi, 1901	*	*
<i>Conops (Conops) flavicauda</i> (Bigot, 1880)	*	-
<i>Conops (Conops) quadrifasciatus</i> De Geer, 1776	-	* (new record)

Species	Egypt	Saudi Arabia
<i>Conops (Conops) rufiventris</i> Macquart, 1849	*	-
<i>Conops (Conops) tomentosus</i> Kröber, 1916	-	*
Tribe PHYSOCEPHALINI		
<i>Physocephala antiqua</i> (Wiedemann, 1830)	*	*
<i>Physocephala chrysorrhoea</i> (Meigen, 1824)	*	*
<i>Physocephala pusilla</i> (Meigen, 1804)	*	*
<i>Physocephala variegata</i> (Meigen, 1824)	*	*
<i>Physocephala vittata</i> (Fabricius, 1794)	*	-
Subfamily MYOPINAE		
Tribe MYOPINI		
<i>Myopa dorsalis</i> Fabricius, 1794	*	-
<i>Myopa picta</i> Panzer, 1798	*	-
<i>Myopa stigma</i> Meigen, 1824	-	*
<i>Myopa testacea</i> (Linnaeus, 1767)	*	-
Tribe THECOPHORINI		
<i>Thecophora atra</i> (Fabricius, 1775)	*	* (new record)
<i>Thecophora fulvipes</i> (Robineau-Desvoidy, 1830)	*	*
Subfamily ZODIONINAE		
<i>Zodion cinereum</i> (Fabricius, 1794)	*	*
<i>Zodion erythrurum</i> Rondani, 1865	*	-

Physocephala variegata (Meigen) is recorded for the first time from Gebel Elba, the south-eastern triangle of Egypt and *Thecophora atra* (Fabricius) is recorded for the first time from the south-western part of Saudi Arabia. Considering that Gebel Elba in Egypt and the south-western part in Saudi Arabia including Al-Baha Region are affiliated to the Afrotropical Region, this is the first time that these two species from the Afrotropical Region have been recorded.

Walker (1871) described *Conops auratus* from “Hor Tamanib” which belonged to Egypt at the time of description; however, it lies now in Sudan. Steyskal and El-Bialy (1967) inaccurately listed this species as an Egyptian species, based mainly on the misleading type locality. Thus, this species is excluded from the Egyptian list in the present study.

This study is one in a series of taxonomic studies on different Egyptian and Saudi Arabian dipteran taxa aiming to catalogue the whole order Diptera in the two countries.

Materials and methods

Data sources. Data of the present study are obtained from three main sources: 1. Specimens preserved in the Egyptian and Saudi Arabian insect collections and museums, namely: Efflatoun Bey's collection, Cairo University, Egypt (EFC); Collection of Entomological Society of Egypt (ESEC); King Saud University Museum of Arthropods, Saudi Arabia (KSMA) and Personal collection M. El-Hawagry (MSHC). 2. Material collected by the authors and their co-workers. 3. Previous studies on the Egyptian and Saudi Arabian Conopidae. The majority of specimens preserved in EFC and ESEC were determined by Dr. Otto Kröber. However, all identifications have been rechecked by the first author using Kröber (1927), Stuke and Clements (2008), Azmy (2016) and Azmy et al. (2016). Photos of *Thecophora atra* have been checked by Dr. Jens-Hermann Stuke (personal communication).

Study area. Ecologists divide Egypt into eight ecological zones: the Coastal Strip (= Mediterranean Coastal Strip), Lower Nile Valley and Delta, Upper Nile Valley, Fayoum, Eastern Desert, Western Desert, Sinai and Gebel Elba (El-Hawagry and Gilbert 2014). These ecological zones are used in the present study in the sections of local distribution. However, Saudi Arabia is not divided into ecological zones by ecologists, so the administrative divisions (also called regions, provinces or emirates) are used instead, namely: Makkah, Riyadh, Eastern Province, Asir, Jazan, Al-Madinah, Al-Qaseem, Tabuk, Hail, Najran, Al-Jawf, Al-Baha and Northern Frontier (Fig. 1) (El-Hawagry et al. 2020).

Classification. The classification and nomenclature in the present study basically follows that used in Stuke (2017), in addition to the tribal arrangement suggested by Gibson and Skevington (2013). Full lists of synonyms for genera and species are not given in the present study as they are already listed in world and regional catalogues; however, we listed only the synonyms of species that have been mentioned in previous Egyptian and Saudi Arabian literature.

World distribution. Stuke (2017) has collected all sources of world distribution of species and it is used here as our basic source. The additional sources, if any, are given between parentheses after each record.

Local distribution and dates of collection. Localities within each Egyptian ecological zone or each Saudi Arabian administrative region are arranged alphabetically and written after a colon following each zone or region, followed by the dates of collection between parentheses. Sources for the local distribution of each species in each country are given between square brackets at the end of the section. Coordinates of Egyptian and Saudi Arabian localities of the family Conopidae are listed (Table 2). Local distribution maps of species based on all available records are given, using SimpleMappr (Shorthouse 2010).

Abbreviations used:

- **AF**, Afrotropical.
- **EFC**, Efflatoun Bey's collection, Department of Entomology, Faculty of Science, Cairo University, Egypt.
- **ESEC**, Collection of Entomological Society of Egypt, Cairo, Egypt.
- **KSMA**, King Saud University Museum of Arthropods, Riyadh, Saudi Arabia.
- **MSHC**, Personal collection M. El-Hawagry.
- **OR**, Oriental.
- **PA**, Palearctic.

The catalogue

Family CONOPIDAE

Subfamily CONOPINAE

Tribe CONOPINI

Genus *Conops* Linnaeus

- GBIF <https://www.gbif.org/species/1444664>

Nomenclature:

Conops Linnaeus, 1758: 604. Type species: *Conops flavipes* Linnaeus, by subsequent designation of Curtis (1831).

Subgenus *Asiconops* Chen

Nomenclature:

Asiconops Chen, 1939: 171. Type species: *Conops aureomaculatus* Kröber, by original designation.

Conops (Asiconops) elegans Meigen, 1804

- GBIF <https://www.gbif.org/species/5076777>

Nomenclature:

Conops elegans Meigen, 1804: 275. Type locality: France (Marseille).

Conops elegans var. *fuscipennis* Macquart 1849: 472. Type locality: Algeria.

Conops algirus Macquart 1849: 473. Type locality: Algeria (environs du Cercle de Lacalle).

Conopaejus aegyptiacus Rondani, 1850: 167. Type locality: Egypt.

Conops fuscanipennis Bigot, 1887: 32. Type locality: Italy (Sicily).

Conops elegans var. *minutus* Kröber, 1916: 48. Type locality: Not given (Cyprus, Limassol in Kröber 1939).

Conops (Asiconops) flavifrons Meigen, 1804

- GBIF <https://www.gbif.org/species/5076765>

Nomenclature:

Conops flavifrons Meigen, 1804: 281. Type locality: France (Lyon).

Physocephala pugioniformis Becker, 1913: 611. Type locality: Iran.

Conops minor Becker, 1922: 201. Type locality: Russia, Italy, Hungary & Greece.

Conops kroeberi var. *immaculata* Paramonov, 1927: 4. Type locality: Armenia.

Conops kroeberi Paramonov, 1927: 4. Type locality: Armenia.

Distribution: AF: Yemen. PA: Albania, Armenia, Austria, ?Belgium, Bulgaria, ?China, Croatia, Czech Republic, Egypt, France, ?Germany, Greece, Hungary, Iran, Italy, Poland, Russia, Serbia, Spain, Syria, Tunisia, Turkey.

Notes: This species was listed by Steyskal and El-Bialy (1967), Chvála and Smith (1988), Azmy (2016) as recorded from Egypt, but these records could not be verified and require confirmation as no specimens have been collected or preserved in Egyptian museums.

Distribution: AF: Cameroon, Ethiopia, Guinea-Bissau, Mozambique, Nigeria, Saudi Arabia [as “South-western part”] (El-Hawagry et al. 2017), Yemen, Zambia. PA: Egypt, Israel, Morocco.

Local distribution and dates of collection (Fig. 2): EGYPT: Upper Nile Valley: South Aswan (as “Nubien”) [Source: Kröber (1915b)]. SAUDI ARABIA: Al-Qassim: Unayzah (May); Asir: Raydah Nature Reserve (May and June); South-western part of Saudi Arabia including Jazan and Najran (September and October) [Sources: Walker and Pittaway (1987), El-Hawagry et al. (2017)) and collected material].

Notes: This species was listed by Kröber (1915b), Steyskal and El-Bialy (1967), Azmy (2016), Stuke (2017) as recorded from Egypt, but no specimens have been collected or preserved in Egyptian museums.

Subgenus *Conops* Linnaeus***Conops (Conops) flavicauda* (Bigot, 1880)**

- GBIF <https://www.gbif.org/species/5076720>

Nomenclature:

Sphixosoma flavicauda Bigot, 1880: 149. Type locality: Iran (Northern Iran and Caucasus).

Conops euzonatus Bigot, 1887: 33. Type locality: Caucasus Mountains.

Conops superbus Röder, 1889: 6. Type locality: Lebanon (Beirut) [as “Beyrut, Syria (Asia minor)”].

Conops cypris Janssens, 1955: 2. Type locality: Cyprus (Akrotiri Bay, Yermdoyia & Erimi).

Distribution: AF: Uganda. PA: Afghanistan, Armenia, Cyprus, Egypt, Greece, Iran, Israel, Lebanon, Syria, Turkey.

Local distribution and dates of collection (Fig. 3): EGYPT: Sinai: Wadi Isla (August) [Sources: Zalat et al. 2008].

Conops (Conops) rufiventris Macquart, 1849

- GBIF <https://www.gbif.org/species/5076705>

Nomenclature:

Conops rufiventris Macquart, 1849: 474. Type locality: Algeria (Constantine).

Material

- a. scientificName: *Conops rufiventris*; taxonID: <https://www.gbif.org/species/5076705>; kingdom: Animalia; phylum: Arthropoda; class: Insecta; order: Diptera; family: Conopidae; country: Egypt; locality: Salloum; decimalLatitude: 31.588751; decimalLongitude: 25.102649; samplingProtocol: Sweeping; eventDate: 05-14-1917; sex: 1 male; lifeStage: adult; recordedBy: Willson; identifiedBy: M. El-Hawagry; dateIdentified: May 2020; institutionCode: EFC

Distribution: Algeria, Egypt, Tunisia.

Local distribution and dates of collection (Fig. 4): EGYPT: Coastal Strip: Salloum (April and May) [Azmy (2016) and museum material in EFC].

Conops (Conops) tomentosus Kröber, 1916

- GBIF <https://www.gbif.org/species/5076849>

Nomenclature:

Conops tomentosus Kröber, 1916: 45. Type locality: Turkmenistan.

Distribution: AF: Saudi Arabia [as “South-western part”]. PA: Iraq, Tajikistan, Turkey, Turkmenistan.

Local distribution and dates of collection (Fig. 4): SAUDI ARABIA: Jazan: Abu-Arish (March) [Source: Stuke et al. (2008)].

Tribe PHYSOCEPHALINI

Genus *Physocephala* Schiner

- GBIF <https://www.gbif.org/species/1568868>

Nomenclature:

Physocephala Schiner, 1861: 138. Type species: *Conops rufipes* Fabricius, by original designation.

Physocephala antiqua (Wiedemann, 1830)

- GBIF <https://www.gbif.org/species/1569080>

Nomenclature:

Conops antiqua Wiedemann, 1830: 239. Type locality: Egypt.

Conops arabica Macquart, 1851: 134. Type locality: Saudi Arabia (Jeddah).

Physocephala furax Becker, 1913: 612. Type locality: Iran.

Physocephala syriaca Kröber, 1915: 72. Type locality: Egypt (Cairo) & Palestinian West Bank (Jericho).

Physocephala obscurifacies Kröber, 1924: 67. Type locality: Egypt (Wadi Hoff).

Materials

Conops truncata Loew, 1847: 21. Type locality: Italy (Sicily).

Physocephala detecta Becker, 1913: 615. Type locality: Iran.

Physocephala vittata var. *abdominalis* Kröber, 1915: 57. Type locality: Turkey, Syria & Cyprus.

Physocephala vittata var. *semirufa* Kröber, 1915: 58. Type locality: Israel.

Physocephala truncata var. *maculigera* Kröber, 1915: 71. Type locality: Egypt, Tunisia, Algeria & Syria.

Physocephala vittata var. *immaculata* Kröber, 1939: 365. Type locality: Cyprus.

Distribution: AF: Ethiopia, Kenya, Yemen. PA: Afghanistan, Algeria, Armenia, Austria, Belarus, Belgium, Bulgaria, China, Croatia, Cyprus, Czech Republic, Egypt, France, Germany, Hungary, Iran, Israel, Italy, Lithuania, Malta, Mongolia, Morocco, Netherlands, Norway, Palestinian Territories, Poland, Portugal, Romania, Russia, Serbia, Slovakia, Spain, Sweden, Switzerland, Syria, Tunisia, Turkey, Turkmenistan, Ukraine, Uzbekistan.

Local distribution and dates of collection (Fig. 7): EGYPT: Coastal Strip: El-Burg, Mariout (May); Sinai: locality and date unknown; Upper Nile Valley: locality and date unknown [Sources: Kröber (1915a), Kröber (1927), Azmy (2016)].

Subfamily MYOPINAE

Tribe MYOPINI

Genus *Myopa* Fabricius

- GBIF <https://www.gbif.org/species/1568357>

Nomenclature:

Myopa Fabricius, 1775: 798. Type species: *Conops buccata* Linnaeus, by subsequent designation of Curtis (1831).

Myopa dorsalis Fabricius, 1794

- GBIF <https://www.gbif.org/species/1568413>

Nomenclature:

Myopa dorsalis Fabricius, 1794: 397. Type locality: Germany.

Myopa ferruginea Panzer, 1794: 24. Type locality: Germany.

Myopa grandis Meigen, 1804: 284. Type locality: Germany.

Myopa dorsalis var. *nigrifacies* Becker, 1922: 289. Type locality: Not given.

Materials

- scientificName: *Myopa dorsalis*; taxonID: <https://www.gbif.org/species/1568413>; kingdom: Animalia; phylum: Arthropoda; class: Insecta; order: Diptera; family: Conopidae; country: Egypt; locality: Behig; decimalLatitude: 30.9310; decimalLongitude: 29.5988; samplingProtocol: Sweeping; eventDate: 02-28-1927; sex: 1 male; lifeStage: adult;

recordedBy: Tewfik; identifiedBy: M. El-Hawagry; dateIdentified: June 2020;
institutionCode: EFC

Tribe THECOPHORINI

Genus *Thecophora* Rondani

Nomenclature:

Thecophora Rondani, 1845: 15. Type species: *Myopa atra* Fabricius, by monotypy.

***Thecophora atra* (Fabricius, 1775)**

- GBIF <https://www.gbif.org/species/1569366>

Nomenclature:

Myopa atra Fabricius, 1775: 799. Type locality: Denmark (Copenhagen).

Myopa annulata Fabricius, 1794: 399. Type locality: Italy.

Myopa maculata Meigen, 1804: 287. Type locality: France.

Myopa micans Meigen, 1804: 288. Type locality: France.

Myopa femorata Fabricius, 1805: 181. Type locality: Germany.

Occemya fulvifrons Robineau-Desvoidy, 1853: 134. Type locality: France.

Occemya meigeni Robineau-Desvoidy, 1853: 135. Type locality: France.

Occemya grisea Robineau-Desvoidy, 1853: 137. Type locality: France.

Occemya lamarckii Robineau-Desvoidy, 1853: 140. Type locality: France.

Occemya guerini Robineau-Desvoidy, 1853: 141. Type locality: France.

Occemya bigoti Robineau-Desvoidy, 1853: 142. Type locality: France.

Occemya brunipes Robineau-Desvoidy, 1853: 143. Type locality: France.

Occemya lucasi Robineau-Desvoidy, 1853: 144. Type locality: France.

Materials

- a. scientificName: *Thecophora atra*; taxonID: <https://www.gbif.org/species/1569366>;
kingdom: Animalia; phylum: Arthropoda; class: Insecta; order: Diptera; family: Conopidae;
country: Egypt; locality: Ezbet El-Nakhl; decimalLatitude: 32.1111; decimalLongitude:
32.1625; samplingProtocol: Sweeping; eventDate: 04-25-1924; sex: 1 male; lifeStage:
adult; recordedBy: Efflatoun; identifiedBy: M. El-Hawagry; dateIdentified: June 2020;
institutionCode: EFC
- b. scientificName: *Thecophora atra*; taxonID: <https://www.gbif.org/species/1569366>;
kingdom: Animalia; phylum: Arthropoda; class: Insecta; order: Diptera; family: Conopidae;
country: Egypt; locality: Hawamdia; decimalLatitude: 29.9092; decimalLongitude:
31.2615; samplingProtocol: Sweeping; eventDate: August.1925; sex: 1 female; lifeStage:
adult; recordedBy: Efflatoun; identifiedBy: M. El-Hawagry; dateIdentified: June 2020;
institutionCode: EFC
- c. scientificName: *Thecophora atra*; taxonID: <https://www.gbif.org/species/1569366>;
kingdom: Animalia; phylum: Arthropoda; class: Insecta; order: Diptera; family: Conopidae;
country: Egypt; locality: Helwan; decimalLatitude: 29.8500; decimalLongitude: 31.3333;
samplingProtocol: Sweeping; eventDate: 12-11-1934; sex: 1 female; lifeStage: adult;
recordedBy: Farag; identifiedBy: M. El-Hawagry; dateIdentified: June 2020;
institutionCode: EFC
- d. scientificName: *Thecophora atra*; taxonID: <https://www.gbif.org/species/1569366>;
kingdom: Animalia; phylum: Arthropoda; class: Insecta; order: Diptera; family: Conopidae;
country: Saudi Arabia; locality: Al-Aqiq; samplingProtocol: Sweeping; eventDate:
4-20-2011; sex: 1 female; lifeStage: adult; recordedBy: El-Hawagry; identifiedBy: M. El-
Hawagry; dateIdentified: June 2020; institutionCode: MSHC

Distribution: AF: Saudi Arabia [as “South-western part”] (first record). OR: India, Sri Lanka. PA: Afghanistan, Albania, Algeria, Austria, Belgium, Bosnia and Herzegovina, Bulgaria, China, Croatia, Cyprus, Czech Republic, Denmark, Egypt, Finland, France, Germany, Great Britain, Greece, Hungary, Iran, Ireland, Italy, Japan, Kyrgyzstan, Lithuania, Luxembourg, Macedonia, Malta, Mongolia, Montenegro, Morocco, Netherlands, North Korea, Norway, Poland, Portugal, Romania, Russia, Serbia, Slovakia, Spain, Sweden, Switzerland, Tunisia, Turkey, Turkmenistan, Ukraine.

Local distribution and dates of collection (Fig. 10): EGYPT: Coastal Strip: Mariout (April and May); Lower Nile Valley and Delta: Ezbet El-Nakhl, Hawamdia, Helwan, Kafr Hakim, Mazghouna (March to December) [Sources: Azmy et al. 2016 and museum material in EFC and ESEC]. SAUDI ARABIA: Al-Baha: Al-Aqiq (April) [Source: collected material].

Notes: This species (Fig. 12b) is recorded herein for the first time from Saudi Arabia and this is the first record in the Afrotropical Region considering the south-western part of Saudi Arabia to be affiliated with the Afrotropical Region.

***Thecophora fulvipes* (Robineau-Desvoidy, 1830)**

- GBIF <https://www.gbif.org/species/1569429>

Nomenclature:

Myopa fulvipes Robineau-Desvoidy, 1830: 246. Type locality: France (Paris).

Myopa sundewalli Zetterstedt, 1844: 942. Type locality: Sweden.

Material

- scientificName: *Thecophora fulvipes*; taxonID: <https://www.gbif.org/species/1569429>; kingdom: Animalia; phylum: Arthropoda; class: Insecta; order: Diptera; family: Conopidae; country: Saudi Arabia; stateProvince: Asir; locality: Garf Raydah Nature Reserve; decimalLatitude: 18.194917; decimalLongitude: 42.4072; samplingProtocol: Malaise trap; eventDate: 06-07-2014; sex: 1 female; lifeStage: adult; recordedBy: Aldhafer H.M. et al.; identifiedBy: M. ***Zodion erythrurum* Rondani, 1865**

- GBIF <https://www.gbif.org/species/1568759>

Nomenclature:

Zodion erythrurum Rondani, 1865: 146. Type locality: Italy (Etruria).

Zodion pulchrum Loew, 1868: 384. Type locality: Italy.

Zodion vittipes Strobl, 1906: 331. Type locality: Spain.

Distribution: PA: Algeria, Bulgaria, Egypt, France, Hungary, Israel, Italy, Kazakhstan, Kyrgyzstan, Morocco, Poland, Romania, Russia, Serbia, Spain, Tunisia, Turkey, Turkmenistan, Ukraine.

Local distribution and dates of collection (Fig. 11): EGYPT: Coastal Strip: Burg El-Arab, Mariout (February to April); Eastern Desert: Wadi Digla (July and August); Gebel

Elba: locality and unknown (April and May); Upper Nile Valley: Esna (January) [Sources: Kröber (1927), Azmy (2016) and museum material in ESEC].

Acknowledgements

The authors would like to extend their sincere appreciation to the Deanship of Scientific Research at King Saud University for funding this work [Research group No: RG-1437-009].

We are grateful to Dr. Jens-Hermann Stuke, Roter Weg 22, D-26789 Leer, Germany and Dr. David Clements, 7 Vista Rise, Llandaff, Cardiff, CF5 2SD, U.K. for providing critical assistance throughout this study and for supplying us with some relevant papers. We are also grateful to the research team in KSMA for collecting, mounting and photographing specimens.
